Multi-Dimensional PFDC ($D > 2$): 2D Subspace Stacking, Hyper-Ellipsoidal Geometry, and Force Superposition

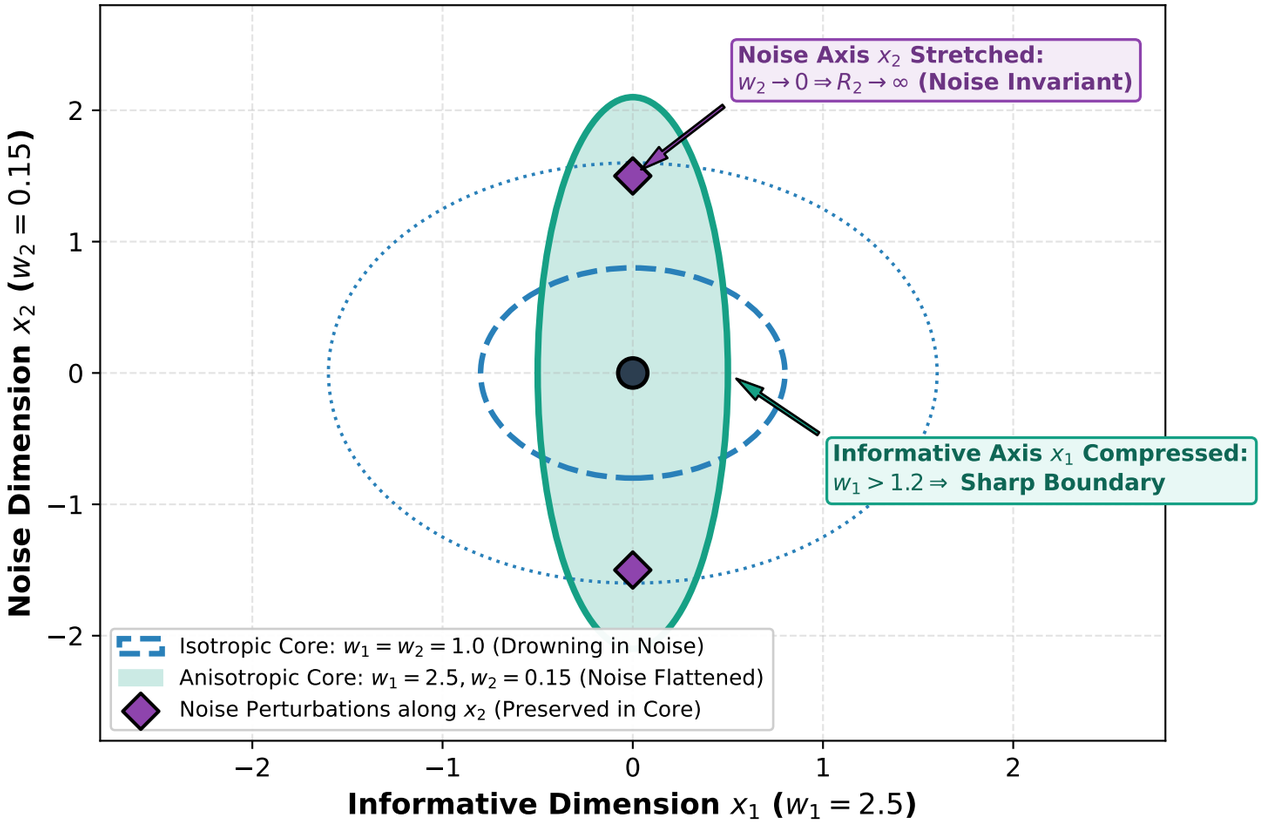

(a) Pairwise 2D Orthogonal Subspace Slice (x_1, x_2)

(b) Volumetric Stacking: 2D Slices → 3D Hyper-Ellipsoid

(c) Metric Tensor Geometry: Stretching Noise vs. Sharpening Signal

(d) Vector Force Superposition Across Stacked Subspaces
